

Grandstands, Stages, Special Constructions

## Economical and Unique.

Based on many years of experience from a variety of sports and cultural events, we know exactly what is important in event constructions. Temporary or permanent structures – NUSSLI combines know-how with flexibility and the capacity of a full service provider, who thinks on his feet and acts accordingly. These qualities make us a reliable partner in terms of economy, security and commitment.

In addition to technically perfect construction solutions, target-oriented project preparation, sophisticated logistics, and extensive installation know-how are what we contribute towards your successful events. Our employees face and overcome challenges with regards to architecture, technology, and logistics on a daily basis. We fulfill our orders faithfully, with complete commitment and reliability. NUSSLI provides grandstand and stage systems for hire or purchase. Where required, we take on the overall responsibility for the entire delivery of the event infrastructures.

## Grandstands: With Complete System and Solution Focus.

The planning and construction of grandstands is our core competence. Our construction systems are freely configurable and allow a variety of applications due to their modularity and versatility. They are technically sophisticated, and comply with international safety standards. These proprietary grandstand systems are the result of decades of experience and solution competence. Our grandstands are easily extended with additional temporary structures, like roof constructions or integrated functional buildings.

We deliver grandstands in different variations, depending on the type and size of the event:

- Seated grandstands (with folding seats, chairs, or benches)
- Standing terraces
- Grandstands with curve
- Grandstands for indoor and outdoor use
- Roofed grandstands
- VIP grandstands

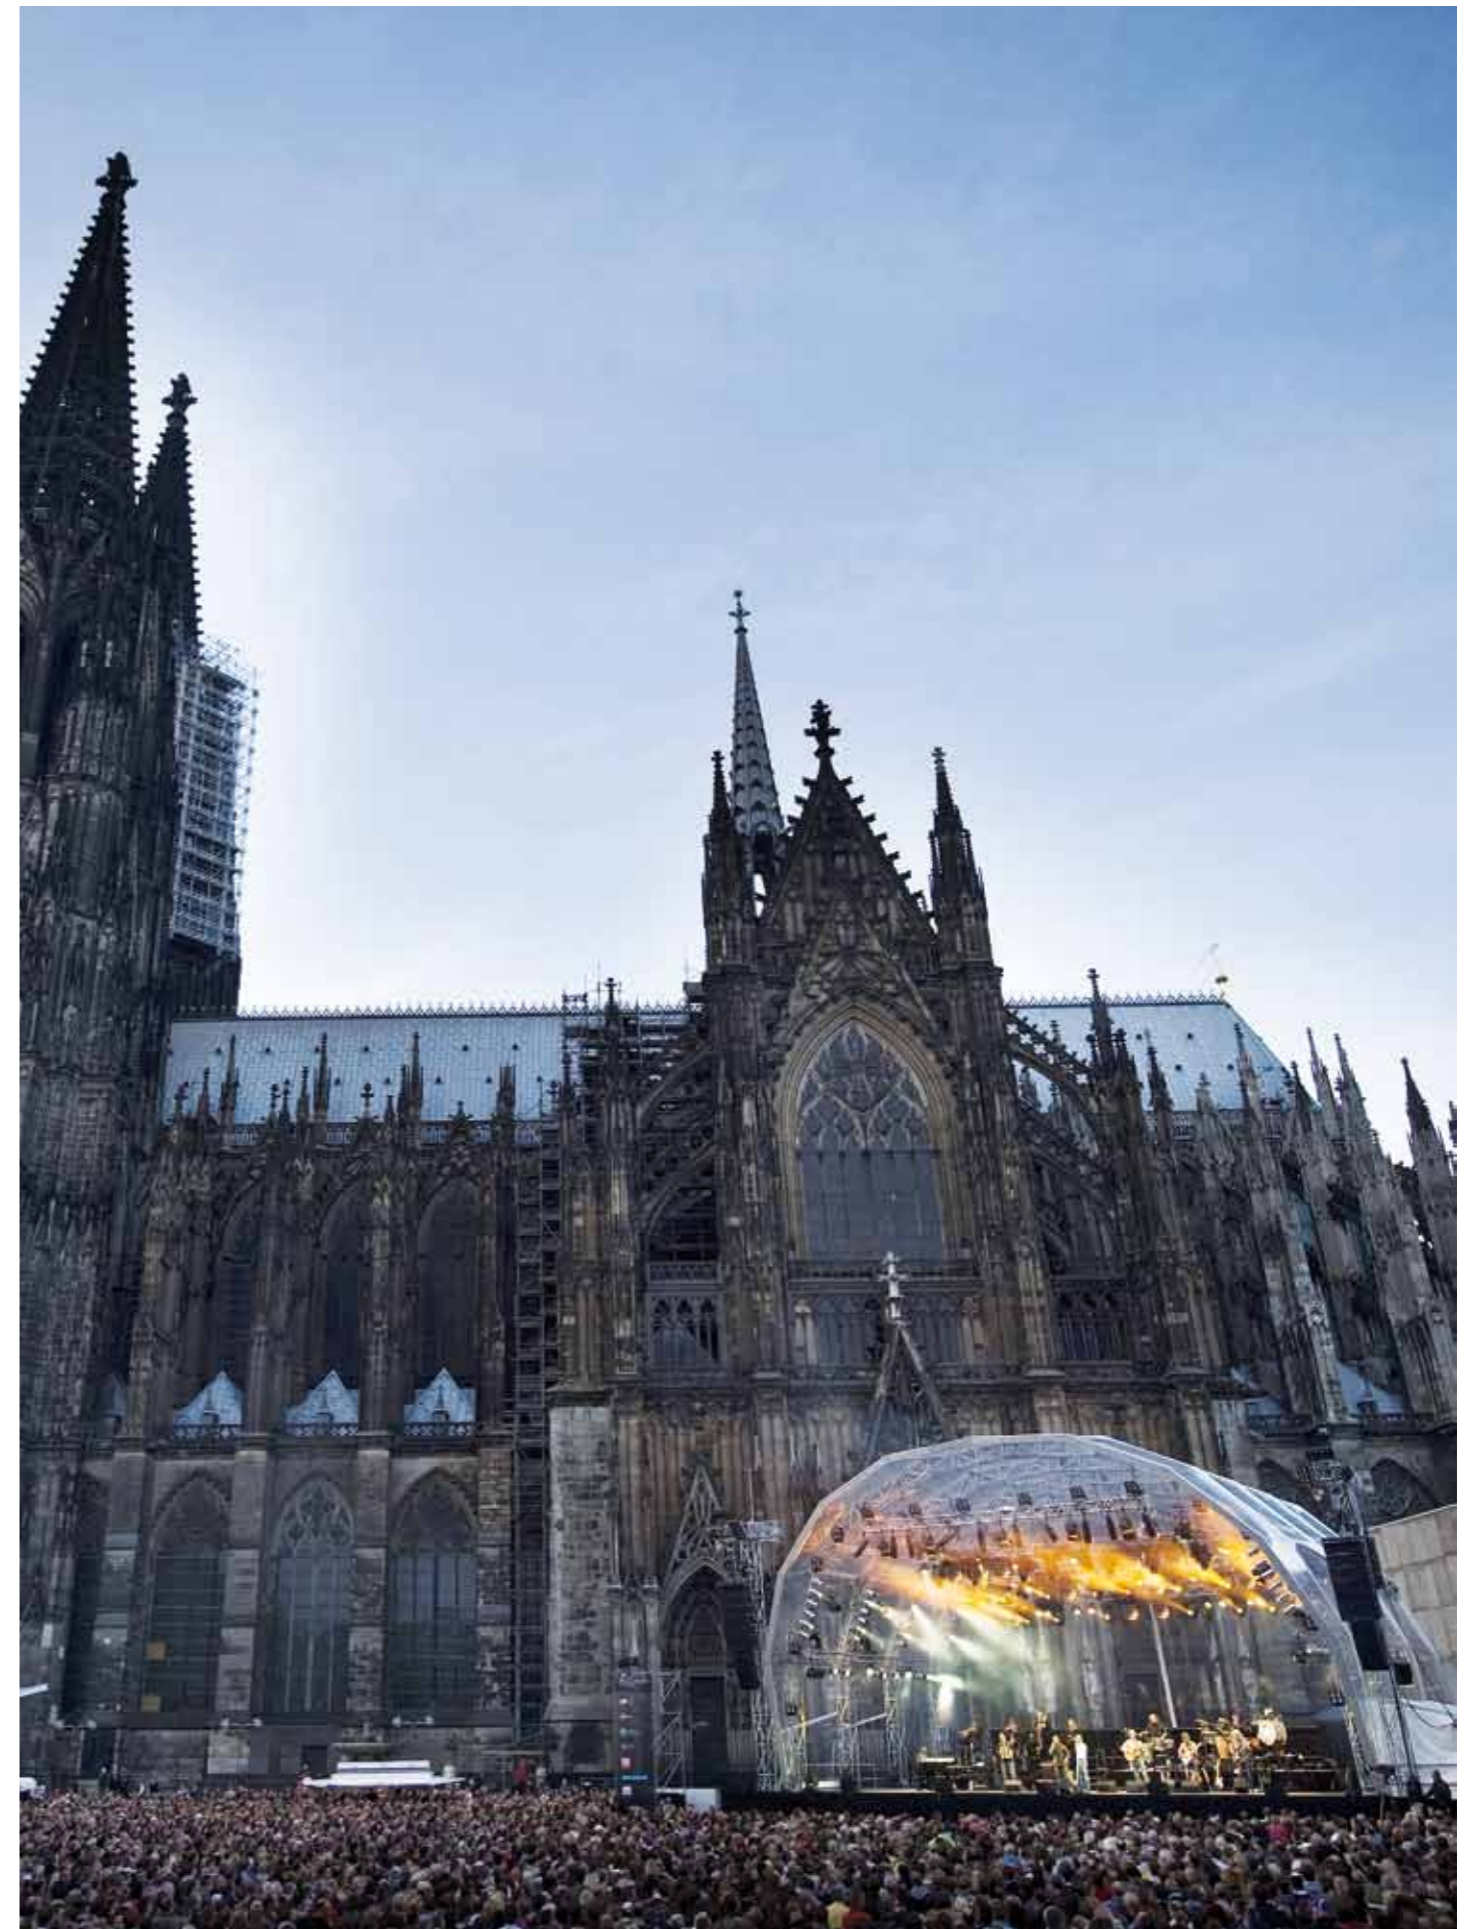

## Stages: Flexible and Exceptional.

Our stages are the perfect setting for stars – for operas, festivals, musical performances, or for moderating large-scale sports events. We create and implement stages and backdrops in all imaginable shapes and sizes. We construct technically and architecturally sophisticated stage structures based on the great versatility and combinability of our modular systems.

Our experience and know-how from countless successful events allows us to adapt stages to the most unusual locations. That means that we can create stages on steep inclines and even in water.

We deliver stages in different variations, depending on the type and size of event:

- Stages / podiums / platforms
- Open air stages (incl. FoH, PA tower, etc.)
- Stage roofing
- Stage elements
- Stage set constructions

## Special Constructions: Well Thought out to the Last Detail.

Grandstand and stage construction is, however, by far not the length and breadth of our know-how. As specialists for temporary event structures, we can also provide a broad spectrum of event infrastructure services for a successful sports or cultural event. Over time, we have developed a number of special constructions to suit any event.

Our service portfolio for special constructions includes:

- Stairs
- Walkways
- Cable bridges
- Towers and media towers
- Ski and snowboarding ramps
- Halls
- Event constructions
- Support structures (video screens, etc.)

## Convincing Arguments.

Reliability, speed and flexibility – we know what needs to be done. We see ourselves as your partner, and we bring our competence and solution-oriented know-how to the table. The reliable and premium quality implementation of event infrastructures is our strength. In close cooperation with our clients and affiliates, we will always find and implement the perfect solution. Our broad experience and international service network allows us to implement the most ambitious, and most complex solutions. We guarantee economy and success.

## Competent and Comprehensive.

We have a deep understanding of all the various requirements that have to be fulfilled with regards to event infrastructures. Important here are fast and cost-efficient construction processes. We offer competent support for planners and clients, and will take on all responsibilities with regards to function, quality, costs and scheduling for the delivery of all infrastructures on request. We deploy value engineering and design-to-cost processes to optimize the alignment of event requirements with our infrastructures.
